

Social Visit 2017 Sahyog Kushthrog Ashram

A Report

The memorable social visit was conducted on 22nd April, 2017 at “Shahayog Krushth Seva Ashram, Himmatnagar” with a vision to understand the condition of the leprosy affected people who were dejected even by the family members and society. The visit was not only memorable but also a useful learning experience as it taught the lesson of compassion, care and respect. The trust was established by respected Shri. Shurshbhai Soni, who lives the life of simplicity and believes in the ideology human compassion and seva. Mr. Soni’s led trust contribute in many ways in different challenging spheres of society like care taking of Leprosy affected patients, Mentally retarded and partially retarded, tribal

people, poor orphan children and dejected and ill domestic cows. The rehabilitation of the leprosy community in the campus is the most touching aspect of the trust which looks like giving space to someone in the heart and home of Mr. Sureshbhai. The trust builds confidence in such people to live their life happily and self-reliantly. They give life education to them, besides provide them healthy food, medication, treatment and training.

Really the visit was remarkable as it has changed the perspective of many students to look at the social problems and condition of underprivileged people of the society so that they can build a strong society where all kind of people live respectfully with love, care and compassion.
